

The Premium Choice for Glaucoma and Corneal Applications.

| Tissue Type | STERILE CORNEA | | | STERILE SCLERA | | |
|---------------------------|---|---|---|----------------------------------|----------------------------|----------------------------|
| | Glaucoma Patch Graft | | | | | |
| Shape | ● | ● | ◐ | ● | Anatomical | Anatomical |
| Tissue Code* | V0103/V0106 | V0131/V0139 | V0129/V0137 | V0146/V0154 | V0151/V0158 | V0150/V0157 |
| Size & Thickness | Description: Whole moon, full thickness with scleral rim | Description: Whole moon, split thickness (9mm) | Description: Half-moon split thickness (9mm X 4.5mm) | Description: 10mm sclera disk | Description: 1/4 sclera | Description: 1/3 sclera |
| Processing Service Fees** | \$900 | \$600 | \$325 | \$225 | \$375 | \$500 |

*Each pair of tissue codes are interchangeable and will provide the same type of graft. List both codes when ordering. **Valid through 06.30.2021.

Hydrated, irradiated, sterile tissue has long been the gold standard for ocular patch graft options—its low risk of post-surgical infection or immune rejection and long shelf life are obvious advantages. High operational costs and reimbursement concerns have hampered widespread use until now.

OptiGraft™ sterile ophthalmic allografts make high-quality, shelf-stable, terminally-sterilized tissue an affordable option for glaucoma and corneal procedures. Developed by the Lions Eye Institute of Transplant and Research (LEITR), OptiGraft offers a range of practical and clinical benefits.

Lions Eye Institute for Transplant & Research (LEITR) is a not-for-profit company accredited by the EBAA and AATB and registered by the FDA. LEITR meets and exceeds all EBAA, AATB, and FDA regulations to provide surgeons with the highest quality tissue and allows for the best visual outcomes for their patients. As one of the largest combined eye bank and research centers in the world, Lions Eye Institute for Transplant & Research is driven by the needs of ophthalmologists and their patients to lead in developing innovative services.
